Professional Profile

A Senior Full-Stack Developer with over seven years' experience delivering enterprise-grade software across risk management and consultancy domains. Proven experience designing, building, and modernising full-stack applications using C#, .NET, React, TypeScript, SQL, and Azure. Known for driving performance improvements, modernising legacy systems, and delivering scalable cloud-based solutions.

Technical Skills

Languages & Frameworks:
C#, .NET Core, .NET Framework, TypeScript, JavaScript, React

Backend & Data:
SQL, Entity Framework, Microservices Architecture

Cloud & Tools:
Azure, Visual Studio, Git

Practices & Testing:
Agile (Scrum), Unit Testing, NUnit, MSTest

Professional Experience

NHS Improvement — Wellington House, London

Senior Developer (Developer, Analytical Developer) *(Aug 2023 – Present)*
Developer / Analytical Developer *(Oct 2021 – Aug 2023)*
Support Developer *(Sept 2020 – Oct 2021)*

- Led full-stack development of the **NHS Insights Platform**, using React, C#, .NET Core, SQL, and Azure
- Designed and implemented an **Azure WebJob search indexer**, enabling cross-product search across NHS core systems
- Architected a **multi-threaded email processing solution**, improving invitation processing speed by **90%+**
- Built **new microservices from the ground up** to automate operational workflows, including email delivery systems
- Delivered full-stack features using **TypeScript, JavaScript, HTML, CSS, C#, SQL, and Entity Framework**
- Refactored and modernised legacy JavaScript codebases, converting them to **TypeScript** for maintainability, developer convenience, and reliability

Oliver Bathurst's Curriculum Vitae

- Collaborated in Agile teams, contributing to code reviews, sprint planning, and technical design discussions

---

CGI — Reading

C# Software Engineer *(Jan 2020 – Sept 2020)*

- Participated in daily Agile stand-ups and development cycles
- Maintained and improved internal documentation and engineering processes
- Contributed to updates of internal tooling and knowledge bases

---

Sword GRC — Maidenhead

C# Software Developer (Full Stack) *(Jun 2018 – Dec 2019)*

- Independently delivered new features and bug fixes for the flagship **Active Risk Manager** product
- Worked across the full stack, from **TypeScript front-end development to C# backend services**
- Collaborated with designers and engineers to define UI/UX and best-practice implementations
- Developed software in an Agile environment with a strong focus on quality and maintainability

---

Education

University of Reading

BSc (Hons) Computer Science *(2015 – 2018)*

- **First Class Honours (78%)**
- Awarded **Hockney Prize** for highest overall performance in Computer Science

---

Certifications

Microsoft Certified: Azure Fundamentals *(April 2021)*
